

SUDOKU color nic recommended by spiel gut

This game is part of the SUDOKU board game series by intellego holzspiele.

SUDOKU color nic

beech wooden game board,
14 x 14 cm, 4 x 4 fields,
16 one-sided colored Sudoku counters
made from maple wood with default
figures.
recommended selling price: EUR 24.90

Small colored game – big fun. The nic size with only 16 fields is ideal for grown-ups looking for recreation. However, the game is also suitable for children of 5 years and older. This puzzle is substantially easier than the original Sudoku with 81 fields.

In each row, in each column and in each sub-square, a figure may be placed only once. There is only one correct solution to each puzzle.

What's so special about this colored Sudoku?

By using colors instead of numbers, the wrong positions (counters are found more than one time in a row or column) can be easily determined by the player, as he has a great overview. The eyes are pleased by the harmonized colors on the board while the player can comfortably follow his progress.

The default counters are placed on the board with the figure facing up. During play, all the other counters are brought into play with the figure facing down. Thus, it is always clear, which counters are the default ones.

SUDOKU nic – classic or color – is the smallest Sudoku from the SUDOKU board game series by intellego holzspiele: All games are made of high-quality beech wood. No matter if the game is square, circular, small, large with ecru maple counters or counters in brilliant colors - here, Sudoku fans will definitely find the game of their choice.
