

DUEL OF FORMS color

The game for puzzlers: use six tokens to make a shape before your opponent does.

This game is part of the generation games range from intellego holzspiele

Game creator: Gérard Pierson

DUEL OF FORMS color

Round board made from beech wood, diameter 49cm, 12 tokens made from maple, in two colours
Recomm. retail price: EUR 139.00

The first player to create a geometric shape using their six tokens wins the game.

Each player decides whether to create a triangle, hexagon or a line. The key is to block your opponent's shape while continuing to build yours up as quickly as possible.

The fantastic thing about this game is that it challenges the mind as well as being pleasing to the eye. The board is made from fine beech wood and the coloured tokens are made from maple.

Like all games by intellego holzspiele, DUEL OF FORMS is hand-made by German craftsmen. A classic version with acacia and pear tokens is also available.
