

TOWER WORLD

This game is part of the generation games range from intellego holzspiele

TOWER WORLD

One 29cm x 29cm beech wood board – elegantly shaped and beautifully crafted, 2 x 8 towers made from maple and acacia wood. Recommended retail price: EUR 89.00

Towers have always been recognised as symbols of power and freedom. In this game, towers enable knights to reach their objectives. However, the towers' location is not fixed and they are not bound by fixed rules. In fact, they can be moved to any position on the board. As such, both knights must negotiate a fascinating landscape of towers: the Tower World.

If you manage to reach your opponent's starting line with your knight first, you win the game. Knights can only move via the towers, which can be placed anywhere. The higher the tower, the further the knight can jump...

This is a dynamic game for people of all ages who want to try something new. However, seasoned strategy players will also enjoy the sophisticated challenge presented by this game.

Tower World is a high quality product, hand-crafted in Germany. The acacia and maple wood towers lend the game a certain regal character. Absolutely captivating!
